

Ubuntu Innovations (Pty) Ltd

Company Profile

Johannesburg, South Africa

About Us

Ubuntu Innovations (Pty) Ltd is a proudly South African technology company headquartered in Johannesburg, founded on the African philosophy of ubuntu “I am because we are.” We are a close-knit team of 25 professionals who design, build, and support modern software solutions for businesses across South Africa and the broader African continent.

Operating across five specialised departments - Executives, Finance, Human Resources, Sales & Marketing, and Software Development -we combine engineering excellence with people-first values to help our clients grow sustainably in a digital economy. Our culture is collaborative, inclusive, and driven by a shared belief that great technology should uplift the communities it serves.

Our Vision

To be Africa’s most trusted innovation partner - a company where world-class software, ethical business practices, and ubuntu values come together to create lasting impact for our clients, our people, and our continent.

Our Mission

We empower African businesses with secure, reliable, and human-centred software solutions. We do this by:

- Building high-quality custom software and digital products tailored to local market needs.
- Partnering closely with our clients to understand their people, processes, and ambitions.
- Investing in our team’s growth through continuous learning, mentorship, and inclusive leadership.
- Operating responsibly - protecting customer data in line with POPIA and championing cybersecurity best practices.
- Contributing to the South African tech ecosystem through skills development, internships, and community initiatives.

Our Core Values

- Ubuntu -We succeed together. Respect, empathy, and collaboration guide every interaction.
- Excellence - We take pride in our craft and deliver work we can stand behind.
- Integrity - We are transparent, honest, and accountable to our clients and to each other.
- Innovation -We embrace curiosity and challenge the status quo to build better solutions.
- Stewardship - We protect the data, trust, and resources entrusted to us.

Company briefly

- Legal name: Ubuntu Innovations (Pty) Ltd
- Headquarters: Johannesburg, Gauteng, South Africa
- Team size: 25 employees
- Industry: Software development & technology services
- Markets served: South Africa and Sub-Saharan Africa

Our departments

Our 25-person team is organised into five departments, each playing a critical role in delivering value to our clients:

Executives

Provides strategic leadership, sets the company vision, and ensures Ubuntu Innovations operates with integrity, agility, and long-term focus. Responsible for governance, partnerships, and overall business performance.

Finance

Manages budgeting, accounting, payroll, tax compliance, and financial reporting. Safeguards the company's financial health and ensures responsible stewardship of resources in line with South African regulatory requirements.

Human Resources

Champions our people-first culture through recruitment, onboarding, learning and development, wellness, and employment equity. Drives a workplace where every team member can grow and contribute meaningfully.

Sales & Marketing

Builds client relationships, drives revenue growth, and tells the Ubuntu Innovations story across digital and traditional channels. Works closely with Software Development to translate client needs into solutions that deliver real impact.

Software Development

The engineering heart of the company. Designs, builds, tests, and maintains our software products and client solutions - spanning web platforms, mobile apps, APIs, and cloud infrastructure -with a strong focus on quality, security, and maintainability.

Why Ubuntu Innovations

We are small enough to care deeply about every client and every team member, yet skilled enough to deliver software that competes on a global stage. When you work with us, you are not just buying a product or a service -you are partnering with a team that believes technology, done right, can help build a better South Africa.

Ubuntu Innovations (Pty) Ltd

Investor Brief | Johannesburg, South Africa | invest@ubuntuinnovations.co.za | +27 11 555 0100

Dear Investor,

Ubuntu Innovations is a South African technology company building secure, human-centred software for the small and mid-sized businesses that power our economy. Founded on the principle of ubuntu “I am because we are” - we combine world-class engineering with deep local insight to deliver tools that are practical, affordable, and POPIA-compliant from day one. We are raising capital to scale a proven model into a continent-wide opportunity, and we invite you to partner with us.

The Opportunity

Africa’s SMME sector contributes over 40% of GDP yet remains chronically underserved by enterprise-grade software. Existing solutions are priced for Silicon Valley, designed for fibre-rich offices, and indifferent to local data-protection law. Ubuntu Innovations closes that gap with cloud-first products engineered for South African network realities, payment rails, and regulatory frameworks.

The Business

- Team: 25 professionals across five departments - Executives, Finance, HR, Sales & Marketing, and Software Development.
- Product: a modular SaaS platform covering workflow automation, secure file collaboration, and identity management.
- Customers: growing base of South African SMMEs across financial services, professional services, and retail.
- Revenue model: tiered monthly subscriptions with high gross margins and strong net retention.
- Compliance: POPIA-aligned by design, with role-based access control, audit logging, and encrypted storage.

Why Now

Cloud adoption among South African SMMEs is accelerating, fibre and 5G coverage continues to expand, and the POPIA enforcement environment is rewarding compliant-by-design vendors. A small, focused team with low burn and high local credibility is uniquely positioned to win this window.

Why Ubuntu Innovations

- Local-first engineering: products built and tested for African connectivity, currencies, and languages.
- Lean, senior team: 25 employees, balanced across product, go-to-market, and operations.
- Defensible moat: deep customer relationships, POPIA expertise, and a culture competitors cannot copy.
- Disciplined capital use: every rand traced to revenue, retention, or runway.

The Ask

We are raising a strategic round to accelerate product development, expand our Sales & Marketing engine, and open a second market in the SADC region within 18 months. We are seeking partners who value sustainable growth, ethical technology, and long-term shareholder value - not just a quick exit.

We would welcome the opportunity to share our detailed deck, financial model, and product demo at your convenience.

With ubuntu,

The Executive Team - Ubuntu Innovations (Pty) Ltd
