18 June 2026

Ms. Lerato Dlamini

Human Resources Manager
Ubuntu Innovations (Pty) Ltd
Johannesburg, South Africa

Dear Ms. Dlamini,

I am writing to apply for the Junior IT Support Specialist position at Ubuntu Innovations (Pty) Ltd. Your company's ubuntu-driven approach to building secure, locally relevant software for South African SMMEs is exactly the kind of mission I want to support. Helping a 25-person team across Executives, Finance, HR, Sales & Marketing, and Software Development stay productive and protected is work I would take pride in every day.

Over the past two years I have provided first- and second-line support in environments very similar to yours - small offices running a mix of Windows 11, macOS, and Ubuntu workstations, Microsoft 365, Google Workspace, and cloud-hosted line-of-business applications. I designed the user-permission and onboarding model for a 25-user company as part of my CompTIA capstone, including Active Directory group structures, MFA rollout, a POPIA-aligned acceptable-use policy, and a tiered network with VLANs separating Finance and Development traffic from general staff.

What I would bring to Ubuntu Innovations is a calm, user-first troubleshooting style, strong documentation habits, and genuine curiosity about cybersecurity. I close tickets quickly, but I also write them up so the next person -or the user themselves - never has to ask the same question twice. I would love the opportunity to discuss how I can help your team scale support as you grow into the broader SADC market.

Yours sincerely,

Thando M. Nkosi

THANDO M. NKOSI

Junior IT Support Specialist

Soweto, Johannesburg | +27 71 234 5678 | thando.nkosi@email.co.za | linkedin.com/in/Thando Nkosi

PROFESSIONAL SUMMARY

CompTIA A+ and Network+ certified IT support professional with 2+ years of hands-on experience supporting 20–30 user offices across Windows, macOS, and Linux. Skilled in ticket triage, Microsoft 365 and Google Workspace administration, Active Directory user and permission management, network troubleshooting, and POPIA-aligned cybersecurity practices. Known for clear documentation, empathetic user communication, and a passion for helping small businesses operate securely.

CORE SKILLS

- Operating Systems: Windows 10/11, Windows Server 2019, macOS, Ubuntu/Debian Linux
- Productivity & Cloud: Microsoft 365 (Exchange, Teams, SharePoint, Intune), Google Workspace, OneDrive, Zoom
- Identity & Access: Active Directory, Azure AD / Entra ID, group policy, MFA rollout, JML (joiner-mover-leaver) processes
- Networking: TCP/IP, DNS, DHCP, VLANs, Wi-Fi troubleshooting, MikroTik & Ubiquiti UniFi, VPN (OpenVPN, WireGuard)
- Cybersecurity: Endpoint protection (Microsoft Defender, ESET), phishing response, patch management, POPIA & ISO 27001 awareness
- Tools: Freshservice, Jira Service Management, ServiceNow, TeamViewer, AnyDesk, PowerShell & Bash scripting basics
- Soft skills: User empathy, clear documentation, calm under pressure, fluent in English, isiZulu, and Sesotho

PROFESSIONAL EXPERIENCE

IT Support Technician (Level 1–2) - Kasi Tech Solutions, Johannesburg

Mar 2024 – Present

- Sole on-site support for a 28-user creative agency; maintain a first-contact resolution rate of 82% across ~45 tickets per week.
- Designed and rolled out an Azure AD + Intune onboarding workflow that cut new-hire setup time from 4 hours to 35 minutes.
- Led migration of the company file server to SharePoint Online, including permission redesign and end-user training for all departments.
- Implemented MFA, conditional access, and a phishing-reporting button in Outlook; reduced successful phishing incidents to zero over 9 months.
- Author and maintain the internal IT knowledge base (62 articles) in Notion, used by staff for self-service password resets and printer setup.

IT Support Intern - Thusano IT Services (MSP), Centurion

Jan 2023 – Feb 2024

- Supported 8 SMME clients (15–30 users each) across retail, accounting, and NGO sectors via Fresh service ticketing.

- Built a standard 25-user network blueprint - MikroTik router, UniFi APs, VLANs for Finance and Guest, daily cloud backups - deployed at 3 client sites.
- Drafted POPIA-aligned acceptable-use and password policies adopted by 5 clients; trained staff via 45-minute workshops.
- Resolved Tier-1 tickets (Outlook, VPN, printer, Wi-Fi) within SLA 96% of the time; escalated complex network issues with full diagnostic notes.

EDUCATION & CERTIFICATIONS

- Diploma in Information Technology (Network Engineering) - Rosebank College, 2022
- CompTIA A+ (2023) | CompTIA Network+ (2024) | Microsoft MS-900: Microsoft 365 Fundamentals (2024)
- Cisco Networking Academy: Introduction to Cybersecurity (2024)
- Currently studying: CompTIA Security+ (target completion: Sept 2026)

KEY PROJECT - 25-USER OFFICE BUILD-OUT (CAPSTONE)

- Designed end-to-end IT setup for a simulated 25-person company across 5 departments: network topology, AD OU/group structure, shared-drive permissions, backup strategy, and a 12-page cybersecurity policy.
- Presented to a panel of industry assessors; awarded distinction for the permissions model and incident-response playbook.
